

Surf Pools Ltd.

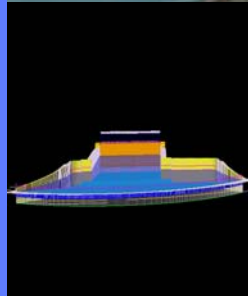

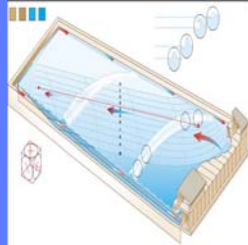

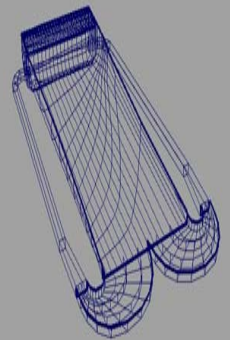

Innovating for Surfing.

The Pro Pool

The Pro Pool is capable of creating hollow tubing waves of up to 8 ft for intermediate to advanced surfers. Specially designed to maximize wave quality and frequency while minimizing the required footprint, the pool is perfect for tight locations where delivering customers high quality surfing waves is a must.

Although the wave generators can be “turned down” to create smaller beginner’s waves, the Pro Pool is designed with the hard core surf enthusiast in mind. Surfers enjoy tubes, air sections, cutbacks, and off the tops. It’s like having a flawless reef break in your backyard that you can turn on anytime you want.

Technical Data		Pro Pool™
